

“**Transas Navigator**” software, **NSP31** release and its compatibility with **Windows 7** and **Windows 8** operational systems.

- **Windows 7.** “**Transas Navigator**” software was tested under following operational systems: **Windows 7 HOME (32/64 bit), Windows 7 PRO (32/64 bit).**

No additional actions needed during installation procedure.

- **Windows 8 International (Multi-Language).** “**Transas Navigator**” software was tested under following operational systems: **Windows 8 PRO (32/64 bit), Windows 8 CORE (32/64 bit).**

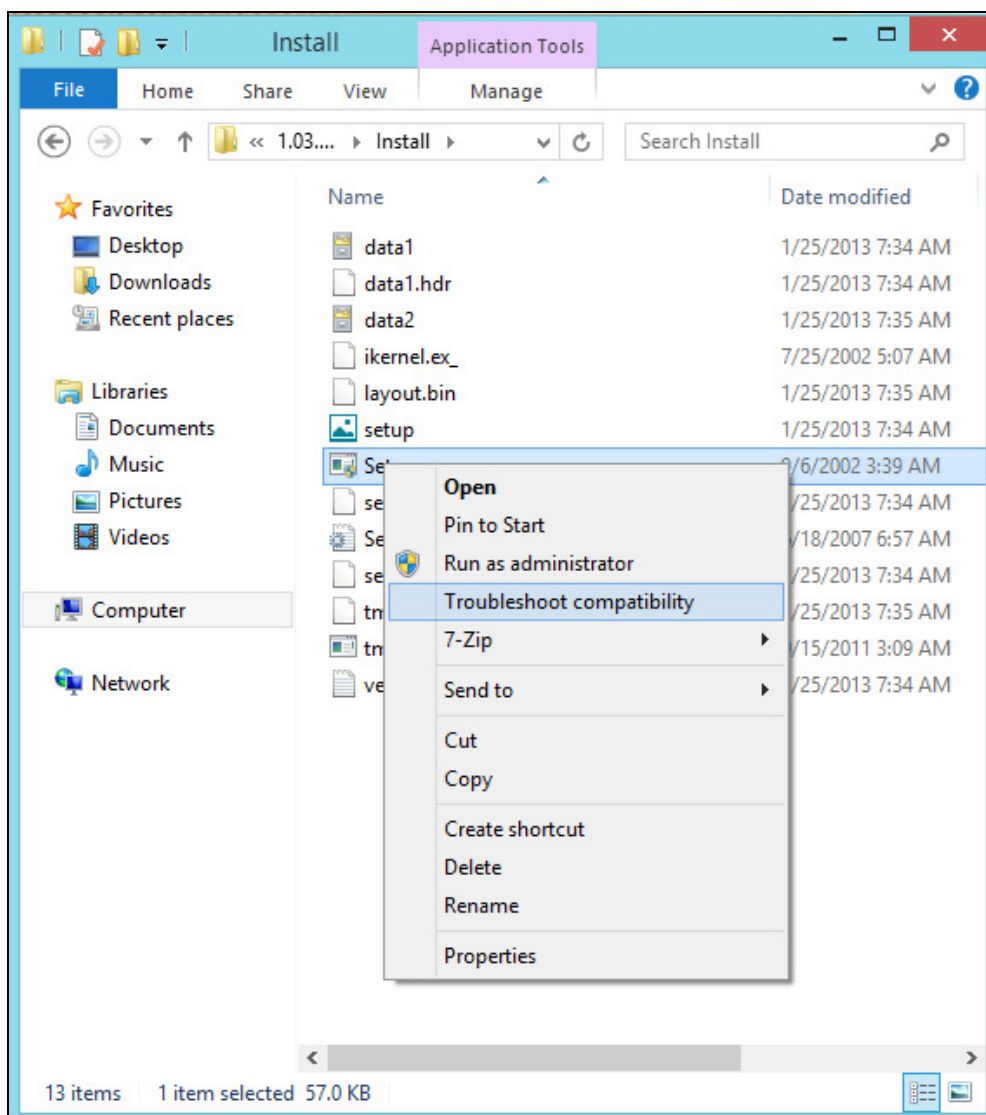

No additional actions needed during installation procedure.

- **Windows 8 Single language \ Local Language version:** Require additional pre-installation steps according to the simple instruction, given in the below mentioned text (see next pages for details):

This article describes the proper installation of the “Transas Navigator” software on PC with the **Windows 8 Local Language (or Single language)** version.

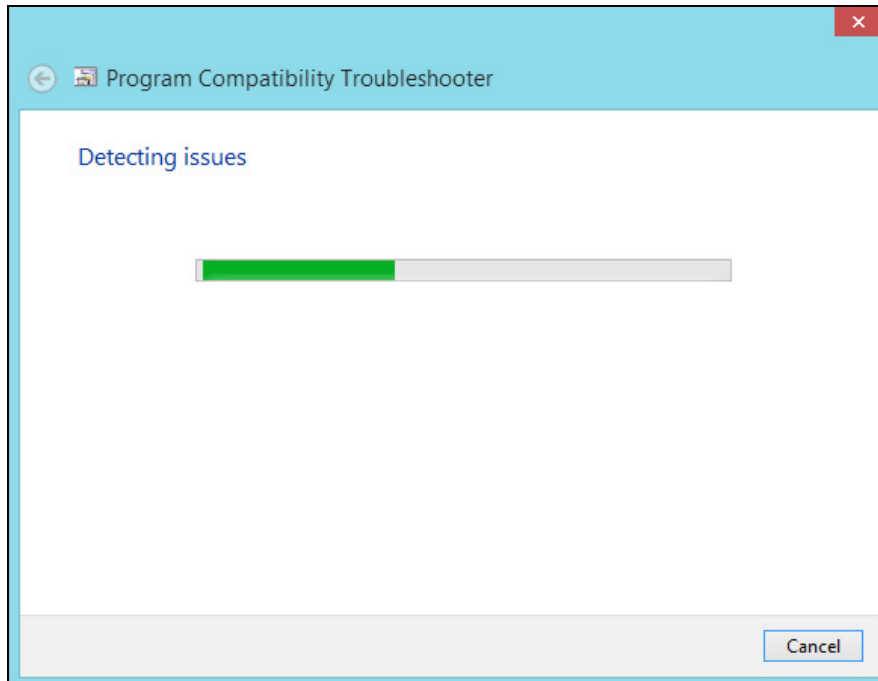

Below mentioned example is shown for the **Win 8 English**, but similar actions to be performed for the any similar localized version of the Win 8 OS (German, Spanish, etc.).

1. Copy “**Transas Navigator**” installation on your PC drive. Right click on a program “**Setup.exe**” file and click/tap on “**Troubleshoot compatibility**” item:

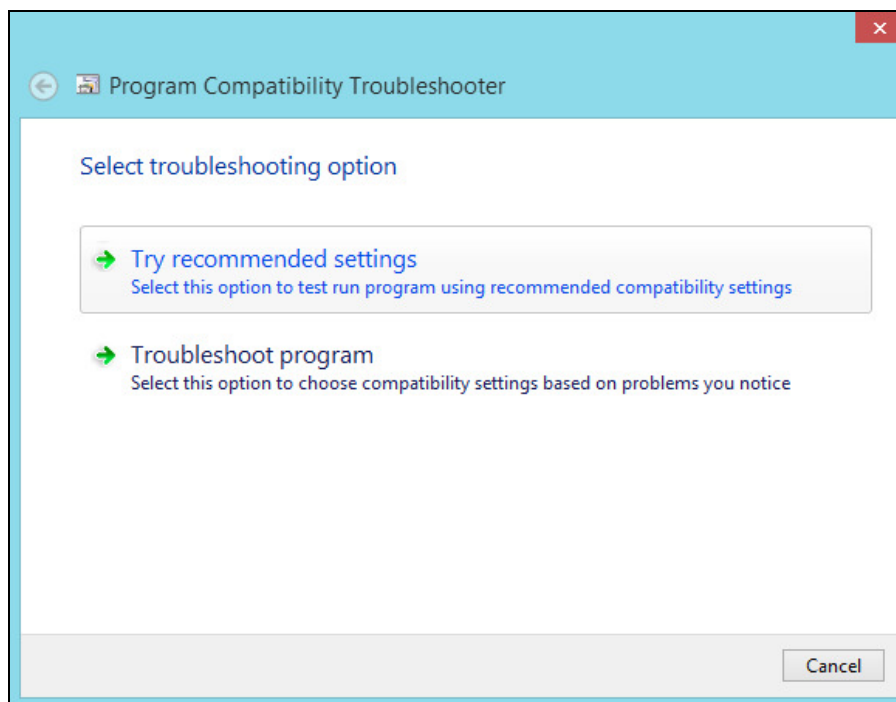

Use right click on a program “Setup.exe” file

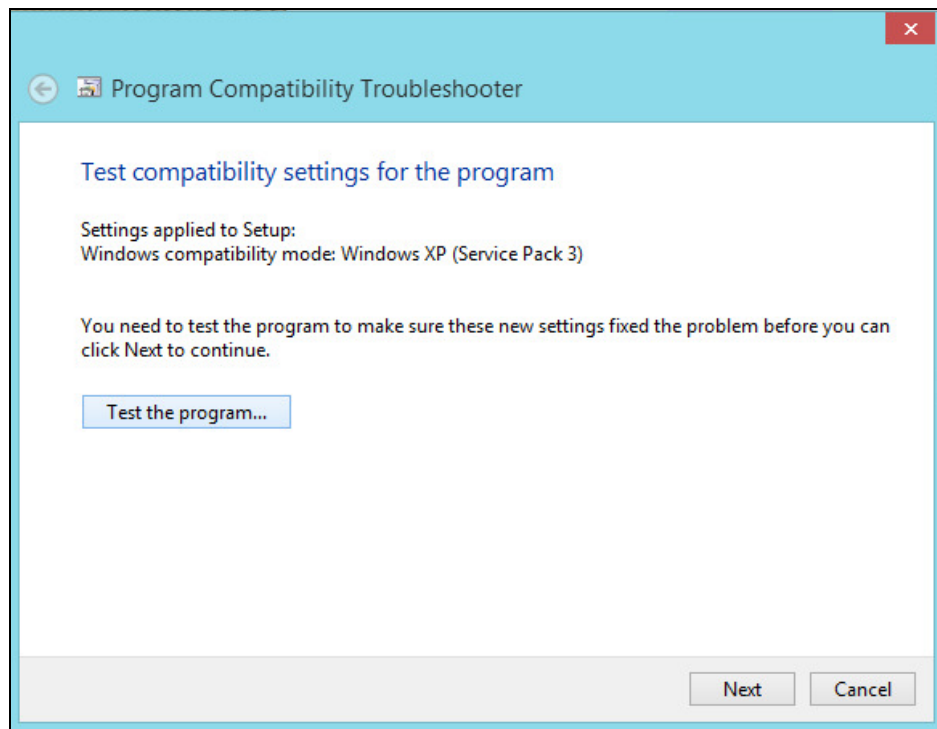

2. Wait, while Windows is trying to detect the compatibility problem:

3. Select and tap “**Try recommended settings**” button on the next page:

- Compatibility parameters will be detected for the “**Transas Navigator**” software (*could be Win XP SP2 or SP3 as on the example below*). Press “**Test the program...**” button and the standard installation of the “**Transas Navigator**” software will be activated after that.

- Perform the standard “**Transas Navigator**” installation and Restart PC at the end.
- Run the “**Transas Navigator**” software and check its operation.
